SQ - Panel.

# Sensor Quality Panel

*Your invisible environment, now made visible.*

## Why Air Quality Should Matter to You.

- **Mood, Focus & Health:** Poor indoor air quality can silently affect your concentration, energy levels and long-term wellbeing.
- **Invisible Toxins:** Pollutants like CO<sub>2</sub> and VOCs build up indoors from everyday sources like furniture, cleaning agents and even breathing, without any visible warning.
- **Modern Wellness Standard:** Just like thermostats manage temperature, smart air sensors are now essential for creating comfortable, productive spaces.
- **Data You Can Act On:** The SQ-Panel helps you see what's in the air, take action and live smarter — whether at home or at work.
- **Smart Monitoring:** Smart Air quality sensors like the SQ-Panel offer real-time insights to help you maintain a healthier indoor environment effortlessly.

## SQ - Panel Features

### Display

Consists of a display with built-in sensors that measures **Temperature, Humidity, Air Pressure, CO<sub>2</sub>, TVOCs and Air Quality.**

### Presence detection

Senses human presence

### Color Options

Comes in White, Black, Black & White

### Mounting

Wall-mounted or table stand with LS990 Jung design frames

### Smart Home Integration

Connects to your Smart Home ecosystem.

## How the SQ - Panel Works

### All-in-One Sensor Display

It combines built-in sensors and a 2.6" touchscreen to continuously monitor CO<sub>2</sub>, TVOC, temperature, humidity, air pressure and even detects room occupancy.

### Set Up with SQ-Connector & App

Plug the panel into the SQ-Connector and launch the Carenuty app via QR code. The app handles the initial setup— monitoring and alerts happen automatically.

### Real-time Display with Visual Tiles

Sensor data is shown on six clear, color-coded tiles. Threshold breaches trigger flashing animations and notifications in the app for quick recognition.

### Custom Threshold Alerts

Set personalized limits for each parameter (e.g., CO<sub>2</sub>, humidity). When values exceed or drop below them, the SQ-Panel flashes and instantly sends alerts to your phone.

### Long-term Tracking

The app lets you view historical trends and analytics—helping you understand patterns, build habits and make data-backed decisions.

### Matter & Ecosystem Integration

After setup, SQ-Panel works in Apple Home, Google Home, Alexa, SmartThings, Home Assistant (and more)—via the Matter standard—without needing the app daily.
